Summary

Software Engineer with expertise in **MERN stack development**, strong fundamentals in data structures, algorithms, and backend systems. Experienced in building modular front-end components, robust APIs, and efficient database schemas. Focused on performance, scalability, and clean architecture. Passionate about solving complex engineering problems and contributing to high-quality, production-grade software products.

Work Experience

Data Analyst Intern, Xcel Corp USA, Belagavi, Karnataka

November 2024 - January 2025

- Analyzed data trends to support strategic decision-making and enhance operational efficiency
- Created visual representations and interactive dashboards using **Power BI**
- Worked with Python libraries including **NumPy, Pandas, Seaborn, Scikit-learn, and Matplotlib**
- Cleaned, validated, and transformed raw datasets for analysis

MERN Full Stack Developer , Ligand Software Solution, Sankeshwar, India

2025 - Present

- Developed full-stack web applications using **MongoDB, Express, React, and Node.js**.
- Built RESTful APIs, database schemas, and secure authentication flows.
- Implemented responsive UI, routing, CRUD operations, and role-based access control.

Project

E-Commerce_Sentiment-Analysis-Using-Python

AI-Chatbot Web-Based (HTML, CSS, JavaScript + Gemini API)
